**Plastic cleaned up:** Water sachets  
(over 2.8 million pieces)  
**Handling:** Collection and sorting

## Location

**Cleanup location:** Kano  
Panisau, Nigeria ([maps](#))

## Activity

## Local organisation Anthophila Limited

## COLLECTION PROJECT

# Kano, Nigeria

### Project information

Empower collaborates with waste aggregator Anthophila to improve Kano's environment by the collection of plastic waste off land thereby ensuring healthy and sustainable living. By collaborating with Anthophila, Empower partnered on a pilot project to collect 50 tons of plastic water sachets in December 2019 to address a big problem with mLDPE plastics that otherwise are tossed on the streets in Kano region, evolving into further collection and creating collection points across Kano.

### Partner organisation information

Anthophila focuses on providing more income opportunities for waste pickers. New initiatives are made to involve further partners or local governmental support programs to empower waste pickers and improve the opportunities to both clean the environment and improve the livelihoods for the community.

Partner organisation's information:
